# FLOCERT GmbH Public Compliance Criteria List - Small Producers' Organisations

Compliance Criteria are established by FLOCERT to translate requirements of the Fairtrade Standards and FLOCERT requirements into verifiable control points that are evaluated during the certification process to determine compliance with the Fairtrade Standards. Non-conformity with a Compliance Criterion is considered non-conformity with the respective standard requirement. Each Compliance Criterion is linked to a specific timeline indicating when it needs to be fulfilled.

There are four types of Compliance Criteria:

Core (C): reflect Fairtrade principles and must be complied with.

Major (M): reflect key Fairtrade principles where non-compliance represents a major risk to the Fairtrade system. Non-conformity with a major compliance criterion may lead to certification sanctions.

**Development (D):** refer to the continuous improvement that certified organisations must demonstrate. Compliance with development criteria is verified against an average score. **Follow-up (F):** criteria which are only applicable to follow-up audits.

Instead of a plain yes/no-approach there are 5 levels of compliance, called ranks. Rank 1 and 2 indicate non-compliance whereas ranks 3 to 5 indicate compliance with the Fairtrade Standards. The FLOCERT Public Compliance Criteria List - Small Producers' Organisations - is based on the Fairtrade Standard for Small Producer Organisations (version dated April 3rd, 2019) and the Fairtrade Product Standards published by Fairtrade International.

This version of the Compliance Criteria supersedes all previous versions. The Compliance Criteria are published in several languages. In the case of an interpretation dispute in any of the published languages, the English version of the Compliance Criteria prevails.

| Coffee 4.1.1 | 1st grade, 2nd<br>grade, 3rd<br>grade | 4.1.0.37 | (Coffee) When market prices for coffee are higher than the Fairtrade Minimum Price, you agree with the traders on coffee prices using the Fairtrade reference for market prices as follows: NYC (Arabica) or London RC (Robusta) plus prevailing differential. The reference market price can never be below the Fairtrade Minimum Price. A negative differential cannot be applied to the Fairtrade Minimum Price.  The organic differential and Fairtrade Premium can never be below the levels defined in the Fairtrade Minimum Price and Premium table. The Fairtrade Premium and organic differential (in the case of organic coffee) are to be added in the contracts, clearly separated from the prevailing differential, regardless of its value, and are not subject to negotiations.  The Fairtrade coffee price is as follows: Reference market price (NYC (Arabic) or London RC (Robusta) plus prevailing differential) or Fairtrade minimum price (whichever is higher) plus Fairtrade organic differential (in case of organic coffee) plus Fairtrade premium. | Use of other references than NYC (Arabica) or London RC (Robusta) AND/OR agreement on prices below the Fairtrade minimum price AND/OR the values of Fairtrade premium, organic differential (if applicable) and prevailing differential are not separated. |        | Use of correct references for market prices AND no agreements on prices below the Fairtrade minimum price AND clear separation of Fairtrade premium, organic differential (if applicable) and prevailing differential values. |        |        | 0    | С             |
